Pendahuluan

Introduction

Humans are social creatures who need other humans and the environment to conduct social activities. Zoon political is a term given by Aristotle to mention that human beings have a social nature. Communication is one of the important parts to discuss because communication is the bridge of human life. Someone will communicate to meet and create a new relationship. In addition to language, communication also needs to consider its effectiveness to enable better interaction. In the conversation, the speaker must try to say something relevant to the situation, clearly and easily understood by the listener. Flouting a maxim is a particularly salient way of getting an addressee to draw an inference and hence recover an implicature. Grundy states flouting is when the speaker carries on a conversation without obeying the rules of maxims

Metode

In this research, the researcher uses the qualitative method. Creswell (2007) states, “a qualitative approach is one in which the inquirer often makes knowledge claims based primarily on constructivist perspectives that are the multiple meanings of individual experiences, meanings socially and historically constructed with the intention of developing a theory or pattern or advocacy/ participatory perspectives that are political, issue-oriented, collaborative, or change-oriented.” Different from the quantitative research aimed at achieving theories or laws of causality that are general enough to allow researchers to predict and control, as done in the study of natural sciences, qualitative research seeks to build understanding (Verstehen) and explanation of human behavior as a creature of social

Pembahasan

This discussion shows the maxim being flouted for different purpose, likes say something untrue in the flouting maxim case of quality, give unrelevant respond n the flouting of maxim of relation case. Through all the discussion, it backs to definition of Flouting maxim by Grice (1975) that flouting maxim occurs when a speaker blatantly fails to observe a maxim at the level of what is said, with deliberate intention generating in implicature. The flouting maxim formed by the speaker contains the implicature behind the speaker's utterance. It supports the result of this study towards the conclusion of the maxim that was flouted by Connor Watts to speak indirectly in some ways because of some purposes.
