Digital Storytelling Media to Improve Students' Speaking Skills in Elementary School

Abstract

**B** *I*  $x^2$   $x_2$

The research carried out was based on the development of digital-based learning media, where it was found that the majority of educators paid little attention to the application of media as a learning aid in the digital era. The purpose of this study was to determine the improvement of students' speaking skills when using the application of digital story media. The research method used in this study is a quantitative method with One Group Pretest - Posttest Design. The population used in the study were students from class V SDN Ngimbangan which amounted to 23 children. The assessment in the research process used a speaking skill rubric which included: (1) Pronunciation, (2) Grammar, (3) Vocabulary Selection, (4) Speaking Fluency, and (5) the Overall Content of the Storytold. From the
