

“PERANCANGAN SISTEM INFORMASI PERSEDIAAN BARANG (INVENTORY APPLICATION) BERBASIS WEB DAN BOOTSTRAP

CSS”

Dipresentasikan Oleh :

Trisna Angga Pradiansa (161080200082)

Dosen Pembimbing :
Arif Senja Fitranji,S.Kom, M.Kom

Sidoarjo, 08 Agustus 2023

Latar Belakang

- Sistem inventory
- Masih pencatatan masih manual
- Sistem tidak berpusat

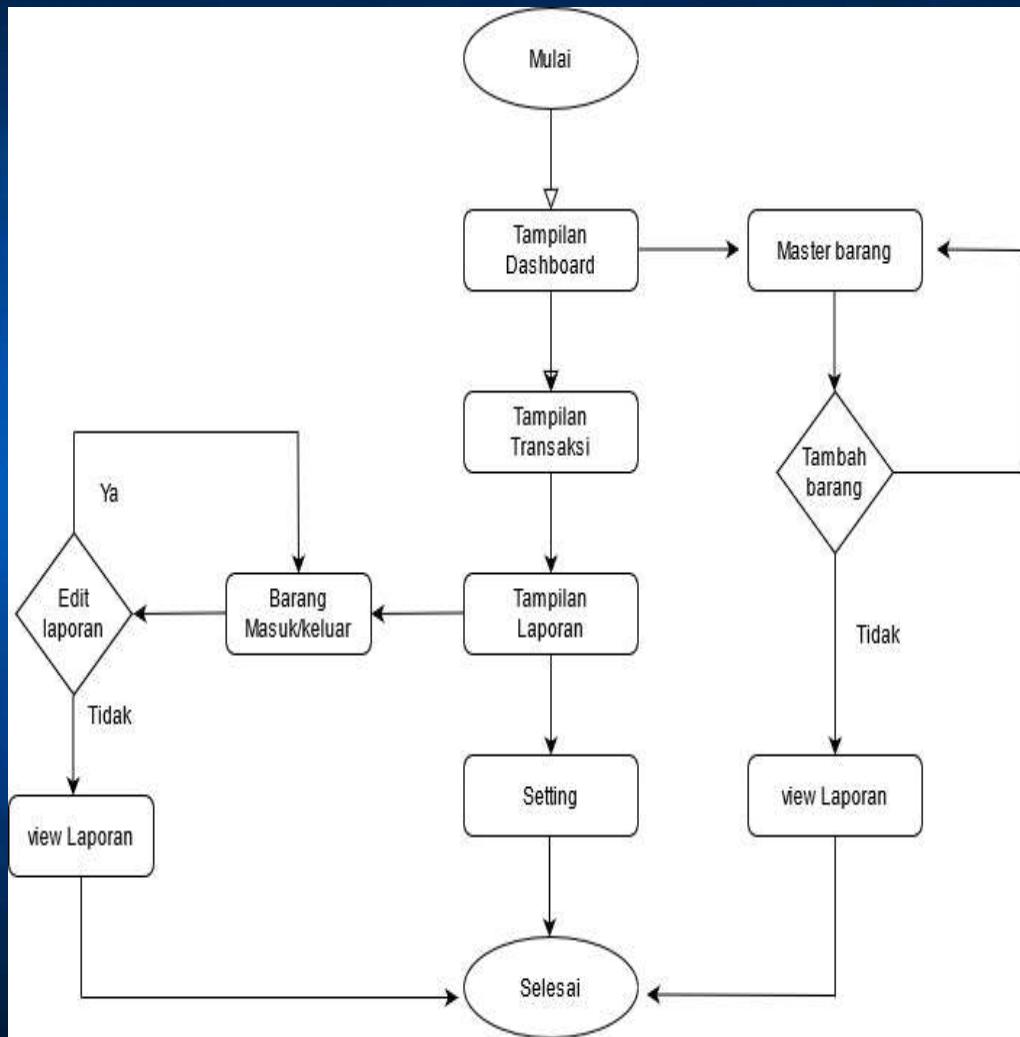

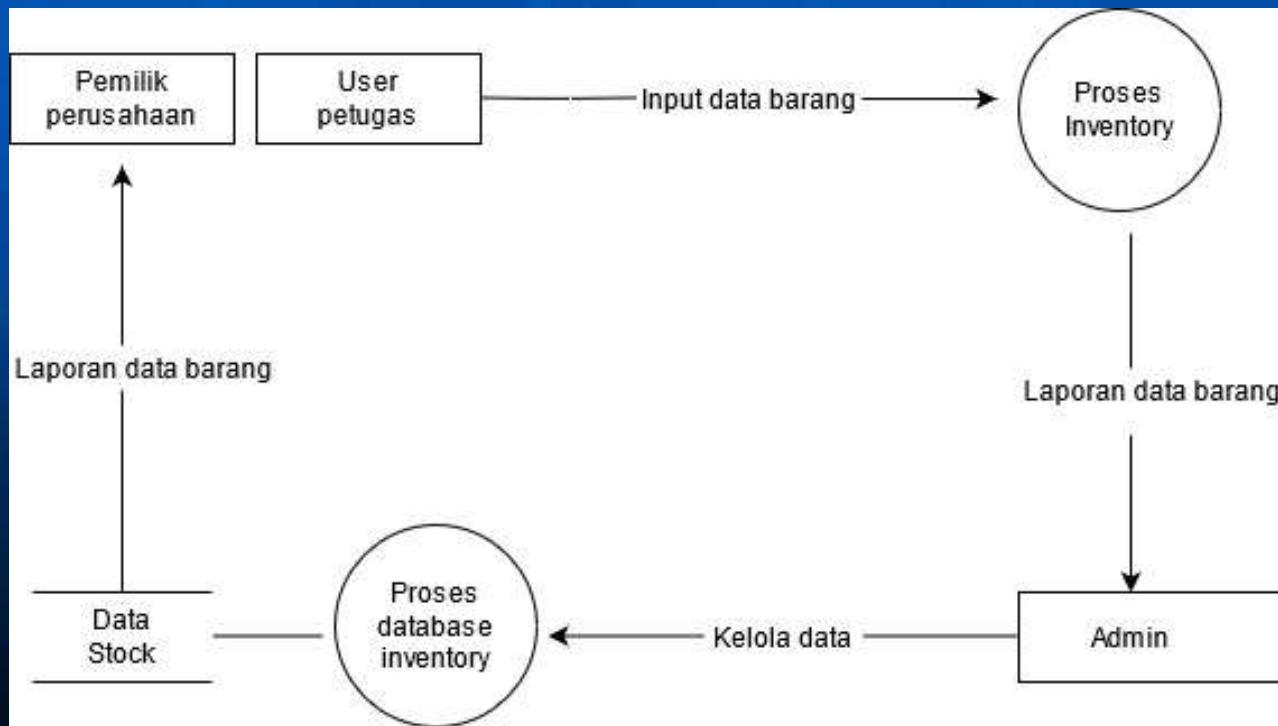

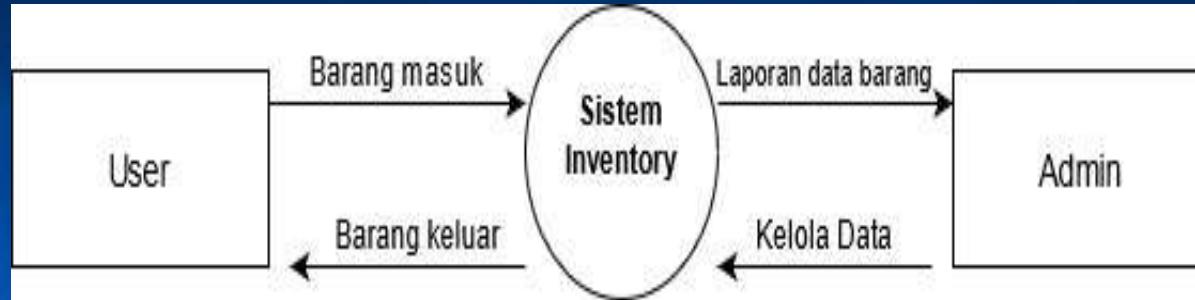

Tinjauan Pustaka

1. Puri Handayani, Sistem Informasi Inventory Barang Gudang Berbasis Web, Bekasi, 2019
2. Hakim, Lukmanu. Bikin Website super keren dengan PHP dan Query.,lokomedia. Yogyakarta, 2011

Metodelogi/Rancangan Sistem

Metodelogi/Rancangan Sistem

Implementasi

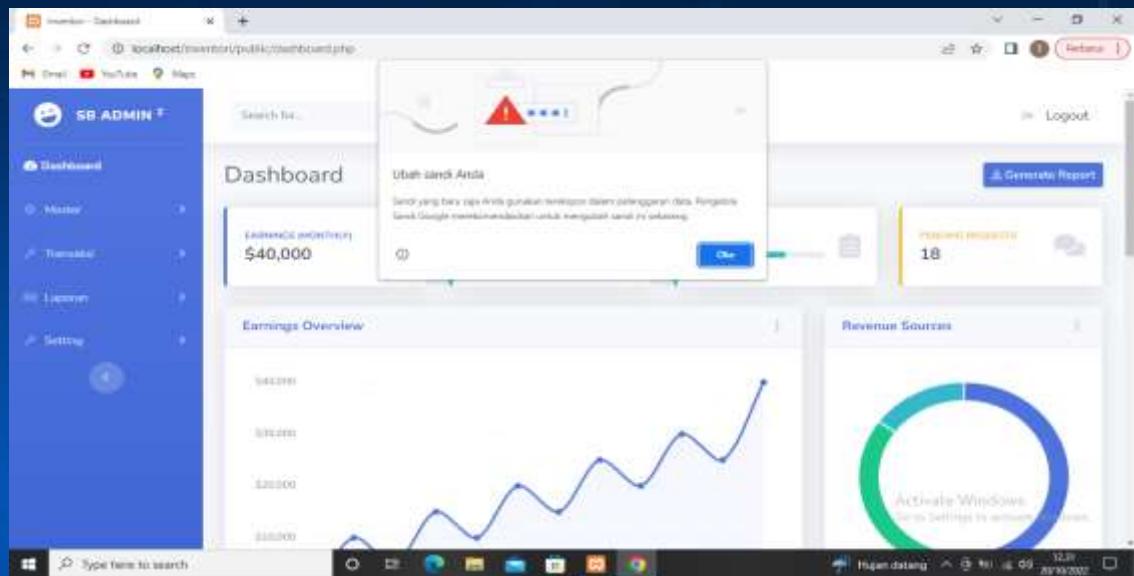

The screenshot shows the main dashboard of a web application. On the left, a blue sidebar titled "Admin" contains a "Dashboard" section with four items: "Master", "Transaksi", "Laporan", and "Setting". The "Master" item is highlighted with a yellow circle. The main content area has a header with "Search" and "Logout" buttons. Below the header, the word "Dashboard" is displayed.

The screenshot shows the "Master Barang" page. The left sidebar is identical to the previous dashboard. The main content area has a header with "Search" and "Logout" buttons. Below the header, the title "Master Barang" is shown. There are two input fields: "Nama" and "Jenis", followed by a "Submit" button. Below these fields, there is a table titled "Data Barang" with columns "Nama", "Jenis", and "Aksi". A single row is visible: "Pallet" under Nama, "Non-Elektronik" under Jenis, and an empty cell under Aksi. At the bottom of the table is an "OK" button.

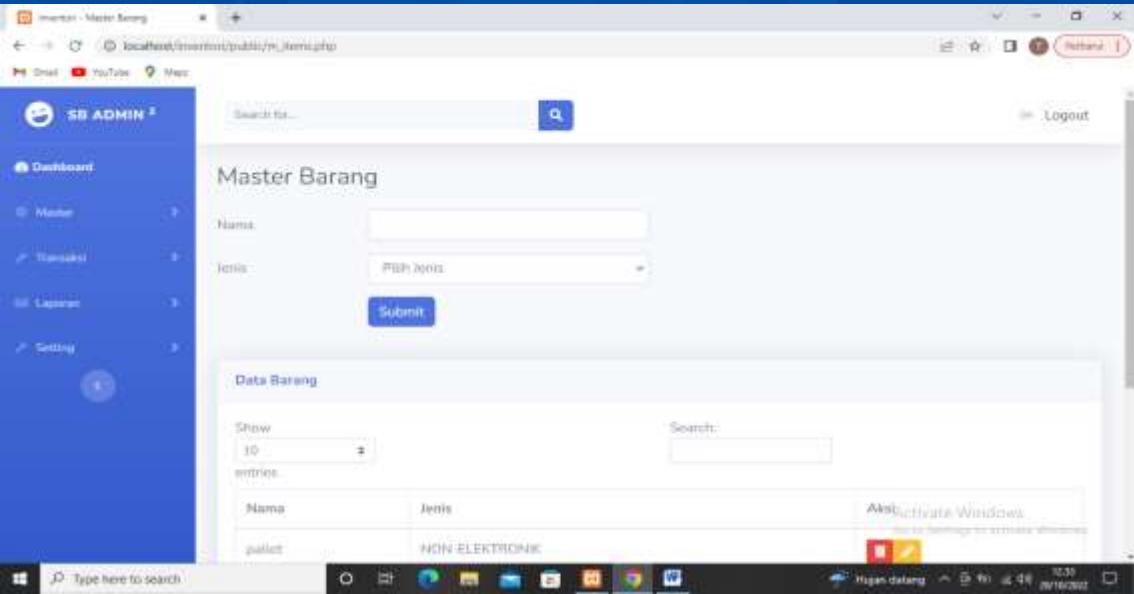

Implementasi

Halaman Dashboard Admin

Halaman Master Barang

Implementasi

Halaman Barang Masuk

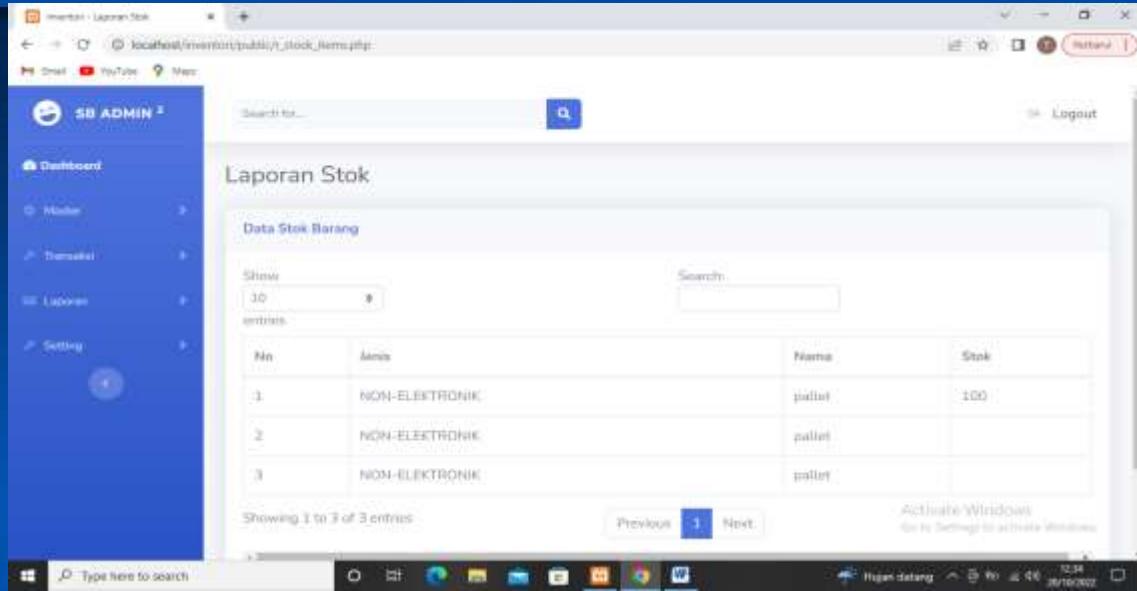

The screenshot shows a web-based inventory management system. The main title is 'Barang Masuk'. It includes fields for 'Nomor' (Number), 'Keterangan' (Description), and 'Tanggal' (Date). Below these, there's a section for 'Barang' (Item) with a dropdown menu for 'Nama' (Name) and a 'Jumlah' (Quantity) input field. A 'Tambah' (Add) button is located next to the quantity input. At the bottom, there are buttons for 'Submit' and 'Logout'.

Halaman Barang Keluar

The screenshot shows the 'Barang Keluar' (Item Output) page. It has similar fields to the input page: 'Nomor', 'Keterangan', and 'Tanggal'. The 'Barang' section also includes a 'Nama' dropdown and a 'Jumlah' input field with a 'Tambah' button. The bottom of the page features a 'Submit' button and a 'Logout' link.

Implementasi

Halaman Ubah Kata Sandi

The screenshot shows a web browser window titled "Inventori - Ubah Kata Sandi" with the URL "localhost/inventori/public/change_password.php". The page has a blue header with the "SB ADMIN" logo and a search bar. On the left, there's a sidebar with menu items: Dashboard, Master, Transaksi, Laporan, and Setting. The main content area is titled "Ubah Kata Sandi" and contains two input fields: "Kata sandi lama" and "Kata sandi baru", each with a corresponding text input box. A blue "Submit" button is located below the fields. At the bottom of the page, there's a copyright notice "Copyright © Your Website 2020" and an "Activate Windows" message with a link to "Settings to activate Windows". The browser's address bar shows "localhost/inventori/public/change_password.php". The taskbar at the bottom includes icons for File Explorer, Mail, and other applications, along with system status indicators like battery level and date/time.

Kesimpulan

1. Sistem Inventory dapat mempermudah staff dalam pengolahan data.
2. Sistem Inventory lebih efisien dan akurat
3. Sistem Inventory sudah sesuai dengan perancangan

Saran

1. Menambahkan fitur data pengunjung
2. menambahkan fitur biaya ekspedisi
3. Menambahkan fitur e-book

THANK YOU

Atas perhatiannya saya ucapkan terima kasih.
Mohon masukkan dari dosen penguji dan dosen pembimbing
