Al-Qur'an is the holy book of Muslims which is believed to be true until the Day of Judgment. So it is obligatory for every Muslim to read, study and practice it. Reading the Koran for Muslims will be worth worship. Therefore Muslims must try to read in accordance with the science of recitation. To lead generations of Muslims to be able to read the Koran well, it takes a teacher of the Koran who is able to read the Koran with tartil according to the rules of tajwid science, and is skilled in managing classes. But in fact, the city of Gresik, which is known as the city of students, turns out that there are still many Al-Qur'an teachers whose quality still needs to be improved.
