Abstract: This study aims to examine the effect of the implementation of audio-visual learning media on the ability to write narratives of grade IV students of Bina Jaya Elementary School. The method used is quantitative with a pre-experimental research design of One Group Pretest-Posttest Design type. The sample of this study was 40 fourth grade students in class IV. The instrument used was a narrative writing test based on six assessment indicators. The results showed that the average posttest score increased compared to the pretest, with the final results showing a significance of 0.000 (<0.05) and an eta squared value of 0.992 which showed a very strong influence. Thus, it can be concluded that the use of audiovisual learning media is effective in
