

- Interviewer: "Good afternoon. Thank you for your time. Can we start with a brief introduction? Where do you teach and what classes do you teach?"
- Teacher: "Good afternoon. Okay, let me introduce myself. I'm a high school English teacher. I currently teach 10th and 12th grade."
- Interviewer: "Okay, ma'am. Before you started implementing Wayground or Quizizz, what media did you use most often for classroom evaluation? What were the main challenges?"
- Teacher: "I used to use paper-based evaluations. The main obstacle was that the method tended to limit interaction, where active participation was usually dominated by one or two students. The other students were often just passive recipients."
- Interviewer: "After switching to Wayground, have you noticed a significant difference in student engagement compared to when you were using paper-based exam sheets?"
- Teacher: "The difference is obvious. With paper-based exam sheets, students often felt bored or passive. But with Wayground, interactions are more inclusive and equitable because every student is encouraged to actively participate simultaneously through their own devices."
- Interviewer: "What about classroom management? Does this platform help you keep students focused on their assessment tasks?"
- Teacher: "Yes. I feel like I can manage my class much better than using paper-based assessments. Assessments are more interactive, which keeps students focused on the assigned tasks."
- Interviewer: "Regarding efficiency, does the automated grading system in Wayground help you save time and effort compared to manual methods?"
- Teacher: "Very efficient. Manually, we usually take time to correct each student's answers on paper. With this technology, the process is much faster and more accurate because the system works."
- Interviewer: "Does the automated reporting feature also help you map out which material needs reinforcement for the next meeting?"
- Teacher: "Yes, it's very helpful. The reports that appear automatically make it easier for me to map students' understanding. From there, I can determine the next steps in teaching more precisely."
- Interviewer: "Now, in terms of usability, how practical is it to prepare questions in Wayground compared to having to print out test sheets?"
- Teacher: "It's much more practical because I no longer have to prepare stacks of test papers or manually distribute answer sheets. Searching for quiz materials in the library is also really easy. Just type in a keyword and thousands of options appear."
- Interviewer: "Students can also just scan the barcode to log in, right? Is that easier?"
- Teacher: "Yes, access is very simple. Students just use the code or barcode to enter the quiz. The process is fast and much more efficient than the old method."
- Interviewer: "But because it relies on the internet, what technical challenges do you face in class?"
- Teacher: "The biggest challenge is just the internet. If the school internet is down or slow, the students usually start complaining, and the fun of learning stops."
- Interviewer: "Seeing the previously quiet classroom atmosphere now become more interactive, does that affect your motivation while teaching?"
- Teacher: "Of course. I enjoy having two-way interaction. It's different from a quiet classroom or when we ask 'do you have any questions?' and no one answers at all."
- Interviewer: "The kids seem really enthusiastic about competition features like 'battle,' don't they, Ma'am?"
- Teacher: "Yes, they enjoy it when there's a war or 'battle' feature with their friends. It sparks their natural competitive spirit and makes them really enjoy the evaluation process."

- Interviewer: "Regarding the leaderboard, does it make students feel pressured or even more enthusiastic?"
- Teacher: "Most of them enjoy it more. They see it as a way to measure their own abilities. The ranking actually fuels their competitive spirit to be number one."
- Interviewer: "Finally, are there any additional features you'd like to see added to support the evaluation process in the future?"
- Teacher: "I'd like to be able to add more comprehensive voice or video features. So the kids can practice their speaking or record their own voices through it."
- Interviewer: "Okay, Teacher. Overall, do you recommend Wayground as a primary evaluation tool or a supplementary one?"
- Teacher: "Personally, I'd only use it as a supplementary one. Because there are so many learning resources, teachers have to be smart about mixing and matching them to keep the learning varied."
- Interviewer: "Okay, Teacher. Overall, do you recommend Wayground as a primary evaluation tool or a supplementary one?"
- Teacher: "Personally, I'd use it as a supplementary tool. Because there are so many learning resources, teachers have to be smart about mixing and matching them to keep the learning varied."
- Interviewer: "Great. Thank you very much for the information. It is very helpful for my research."
