

Rumus Menghitung Persen Hasil Angket

$$\text{Rumus \% Persentase (\%)} = \frac{\text{Jumlah bagian (Jb)}}{\text{Jumlah keseluruhan (Jk)}} \times 100\%$$

a. Indikator Perencanaan Pembelajaran

$$\textcircled{1} \% = \frac{Jb}{Jk} \times 100\%$$

$$\% = \frac{6}{6} \times 100\%$$

$$\% = 100$$

$$\textcircled{2} \% = \frac{Jb}{Jk} \times 100\%$$

$$= \frac{6}{6} \times 100\%$$

$$= 100\%$$

$$\textcircled{3} \% = \frac{Jb}{Jk} \times 100\%$$

$$= \frac{6}{6} \times 100\%$$

$$= 100\%$$

$$\textcircled{4} \% = \frac{Jb}{Jk} \times 100\%$$

$$= \frac{6}{6} \times 100\%$$

$$= 100\%$$

$$\textcircled{5} \% = \frac{Jb}{Jk} \times 100\%$$

$$= \frac{6}{6} \times 100\%$$

$$= 100\%$$

b. Indikator Pelaksanaan Pembelajaran

$$\textcircled{1} \% = \frac{Jb}{Jk} \times 100\%$$

$$= \frac{6}{6} \times 100\%$$

$$= 100\%$$

$$\textcircled{2} \% = \frac{Jb}{Jk} \times 100\%$$

$$= \frac{6}{6} \times 100\%$$

$$= 100\%$$

$$\begin{aligned} \textcircled{3} \% &= \frac{Jb}{JK} \times 100\% \\ &= \frac{6}{6} \times 100\% \\ &= 100\% \end{aligned}$$

$$\begin{aligned} \textcircled{4} \% &= \frac{Jb}{JK} \times 100\% \\ &= \frac{6}{6} \times 100\% \\ &= 100\% \end{aligned}$$

$$\begin{aligned} \textcircled{5} \% &= \frac{Jb}{JK} \times 100\% \\ &= \frac{6}{6} \times 100\% \\ &= 100\% \end{aligned}$$

$$\begin{aligned} \textcircled{6} \% &= \frac{Jb}{JK} \times 100\% \\ &= \frac{6}{6} \times 100\% \\ &= 100\% \end{aligned}$$

$$\begin{aligned} \textcircled{7} \% &= \frac{Jb}{JK} \times 100\% \\ &= \frac{6}{6} \times 100\% \\ &= 100\% \end{aligned}$$

$$\begin{aligned} \textcircled{8} \% &= \frac{Jb}{JK} \times 100\% \\ &= \frac{6}{6} \times 100\% \\ &= 100\% \end{aligned}$$

$$\begin{aligned} \textcircled{9} \% &= \frac{Jb}{JK} \times 100\% \\ &= \frac{6}{6} \times 100\% \\ &= 100\% \end{aligned}$$

c. Indikator Asesmen pembelajaran

$$\begin{aligned} \textcircled{1} \% &= \frac{Jb}{JK} \times 100\% \\ &= \frac{6}{6} \times 100\% \\ &= 100\% \end{aligned}$$

$$\begin{aligned} \textcircled{2} \% &= \frac{Jb}{JK} \times 100\% \\ &= \frac{6}{6} \times 100\% \\ &= 100\% \end{aligned}$$

$$\begin{aligned} \textcircled{3} \% &= \frac{Jb}{JK} \times 100\% \\ &= \frac{6}{6} \times 100\% \\ &= 100\% \end{aligned}$$
