IMPROVING THE DESCRIPTIVE WRITING ABILITY
BY USING THE PICTURE WORD INDUCTIVE MODEL (PWIM)
AT THE EIGHTH GRADE STUDENTS OF SMP KARYA BHAKTI RANTAU
JAYA IN THE ACADEMIC YEAR OF 2017/2018

ABSTRACT

BY : ENDANG SRI WAHYUNI

Writing is the expression of language in the form of letters, symbols, and words. Through writing someone can share their knowledge, conveying idea, feeling and intention to the other people. In teaching learning process, the teacher should be able to create or choose the suitable and good strategy. Picture Word Inductive Model (PWIM) is one of the strategy that can be applied in the teaching English, especially teaching writing ability in descriptive text. The objective of the study is to find out whether the use of Picture Word Inductive Model (PWIM) strategy will be able to improve the students writing ability in descriptive text at the SMP Karya Bhakti Rantau Jaya Udik II East Lampung.

The research uses classroom action research which was done in two cycle. Each cycle consist of planning, acting, observing and reflecting. The subject of this research is eighth class. In collecting the data the researcher used test (pre test, post test 1 and post test 2), observation and documentation.

The result of this research showed that *Picture Word Inductive Model as strategy* had positive result in improving students' writing ability in descriptive text at the eighth grade of SMP Karya Bhakti Rantau Jaya Udik II East Lampung. It can be proven by the students' average score from pre-test to post test. The average score in pre-test was 46,29, post-test 1 was 54,34 and post-test 2 was 68,32. It mean that the using of Picture Word Inductive Model as a strategy could improve the student's writing ability in descriptive text.

Keyword: Writing, descriptive Text , and Picture Word Inductive Model (PWIM)

PENINGKATAN KEMAMPUAN MENULIS DESKRIPTIF
DENGAN MENGGUNAKAN *PICTURE WORD INDUCTIVE MODEL (PWIM)*
PADA SISWA KELAS DELAPAN SMP KARYA BHAKTI
TAHUN AJARAN 2017/2018

ABSTRAK
BY : ENDANG SRI WAHYUNI

Menulis adalah ungkapan bahasa dalam bentuk tulisan, simbol, dan kata-kata. Seseorang dapat berbagi pengetahuan, menyampaikan ide, perasaan dan perhatian kepada orang lain. Dalam proses belajar mengajar, guru harus bisa menciptakan atau memilih sebuah strategi yang baik dan sesuai dengan keadaan siswa. *Picture Word Inductive Model (PWIM)* merupakan salah satu strategi yang biasa digunakan dalam pembelajaran bahasa Inggris khususnya mengajarkan kemampuan menulis siswa pada *descriptive* teks. Tujuan penelitian ini adalah untuk mengetahui apakah penggunaan dari strategi *Picture Word Inductive Model (PWIM)* akan dapat meningkatkan kemampuan menulis *descriptive* teks di SMP Karya Bhakti Rantau Jaya Udik III Lampung Timur.

Penelitian ini menggunakan metode penelitian tindak kelas yang terdiri dari dua siklus. Setiap siklus terdiri dari perencanaan, pelaksanaan, observasi dan refleksi. Subjek penelitian ini adalah kelas delapan. Dalam pengumpulan data, peneliti menggunakan tes (pre-test, post-test 1 and post test 2), observasi dan dokumentasi.

Hasil dari penelitian ini menunjukkan bahwa *Picture Word Inductive Model (PWIM)* sebagai strategi memiliki hasil positif dalam meningkatkan kemampuan menulis siswa di *descriptive* teks kelas delapan SMP Karya Bhakti Rantau Jaya Udik II Lampung Timur. Hal ini dapat dibuktikan berdasarkan nilai pre-test adalah 46,29, post-test 1 adalah 54,34 dan post-test 2 adalah 68,32. Ini berarti bahwa penggunaan *Picture Word Inductive Model (PWIM)* sebagai strategi dapat meningkatkan kemampuan menulis siswa pada *descriptive* teks.

DEDICATION PAGE

I highly dedicate this undergraduate thesis to :

My beloved parents (Mr.Sardi And Mrs.Lamiyem)There are no words to express what is in my heart just only thanks, thanks always giving me everything (your love, patience, prayer, support, suggestions, trust, and motivation). My beloved Sisters (Sutarni and Nyari Astuti) Thanks for your support, suggestions and motivation.

My Beloved Friends (Dian Anggraini, Anas Mutoharoh, Ana Mardiana, Wiji Soviana, Siti Fatimatulzahro And Soon) Absolute (SOLLER) Class Of TBI 2013 and My Beloved Campus IAIN Metro.

ACKNOWLEDGEMENT

In the name of Allah, the Most Gracious, the Most Merciful. Praise is only to Allah SWT, the Lord of the worlds whom without His Mercy and Blessings, none of these would be possible. Thanks also to our idol of life, the man of perfection, Prophet Muhammad SAW, his families and companions. Finally the researcher can accomplish this undergraduate thesis entitles "IMPROVING THE DESCRIPTIVE WRITING ABILITY BY USING THE PICTURE WORD INDUCTIVE MODEL (PWIM) AT THE EIGHTH GRADE STUDENTS OF SMP KARYA BHAKTI RANTAU JAYA IN THE ACADEMIC YEAR OF 2017/2018."

Regarding to the undergraduate thesis , the writer offers her big thank to the Dra. Umi Yawisah, M.Hum as the sponsor and to Syahreni Siregar, M.Hum as the co-sponsor . May Allah SWT give them His better reward for their spending time to support and guide during the undergraduate thesis writing process.

As human being, the writer completely realizes that this undergraduate thesis still has a plenty of weaknesses . The writer do apologizes for all mistake he has made in writing and presentation items. All constructive comments and suggestions are very welcomed to measure the quality of this undergraduate thesis can be a meaningful benefit for the writers especially and for our campus and all readers generally .

Metro, 25 October 2017

The Writer,

Endang Sri Wahyuni

CHAPTER I

INTRODUCTION

A. Background of the study

Language is the primary instrument of the communication among human beings in community. In other word, Language is tool of communication. Language is can said an system to send or exchange information and to interact with the others. Language is used by all people in the world as means of communication. Anyone cannot interact with others without language, thus it is very important to learn language.

English is one of international language. English is regarded as the first foreign language in indonesia which is taught in informal or formal education. There are four language skills in teaching english : listening, speaking, reading and writing. Generally, language can be spoken and written, so it is necessary to learn writing. Writing is one of the language skills that should be mastered by students. In writing skill, the students have to mastery vocabulary and know how to use grammar in making texts or sentences. It is an important skill because it will be applied in many aspects of life. Through writing, students are supposed to be able to express their ideas in writing form. There are many ways to express writing and one of them is through a text. There are many types of text taught in Junior High School. One of the texts taught for the eighth grade students of Junior High School is descriptive. Descriptive is a type of text

whose function is to describe a particular person, place or thing. Descriptive writing also consists of generic structure in range as : identification that is to identify the phenomenon to be described. Description is to describe parts, qualities, and characteristics of the person of something that is the described.

According to the information from the English teachers of SMP Karya Bhakti Rantau Jaya, in learning descriptive, students may have difficulties in learning it. Students may be confused what to write although they know the topic which has been given by the teacher. They are confused to write their idea about the topic. The other factor that may be influence to determine the appropriate word to write. They have lack of vocabulary. They also didnot understand to put the good organization of descriptive.

Students need to be able to write the descriptive clearly. Students should choose the correct word in every sentence to make their description more real. Therefore, English teachers should be able to encourage and motivate students to learn English by using their strategy. The use of appropriate learning strategies can affect students' achievement in learning, especially in descriptive writing ability. The following is students' test result of writing test at class VIII SMP Karya Bhakti Rantau Jaya .

Source: *Teacher's archive*, English Writing Score at the Eighth Grade of SMP

Karya Bhakti Rantau Jaya, on November 24th, 2016.

The evidence is with the result of the test that there is 28 of students, 80 % of them (around 24 students) got under 60. It can be concluded that students' writing score among the eighth grade is still low.

Based on the problem and the students' writing score above, the student still confuse to write although know the topic and choose the appropriate word because the students are limited vocabulary. Considering of the problem, the reseacher is interested to use strategy that is Picture Word Inductive Model (PWIM) to teach english process in SMP Karya Bhakti Rantau Jaya .

Picture Word Inductive Model (PWIM) is an appropriate strategy in descriptive writing which uses the advantage as picture of the learning media in teaching and learning process. Picture Word Inductive Model (PWIM) consists of picture which are familiar to the students. It is to make the students able to identify it easily. PWIM is interesting and enjoyable activity where the students can enjoy gaining object and events through picture to write descriptive.

Based on explanation above, the researcher can be used the Picture Word Inductive Model (PWIM) in teaching writing among the eighth grade students of SMP Karya Bhakti Rantau Jaya.

B. Problem Identification

Based on background above, some problems can identifying as follows:

1. The vocabulary of the students is limited.

2. The students are confused to choose the correct word to make their description.
3. Most students still confuse to determine the appropriate word to write descriptive.
4. The students do not understand to put the good organization of descriptive.

C. Problem Limitation

Looking at the identification of the problems, researcher realizes that many problems, there are many issues to be limited in the discussion in this undergraduate thesis.

Researcher uses an appropriate strategy to help students improve their descriptive writing ability that is easier. The researcher assumes that by using Picture Word Inductive Model (PWIM) to teach descriptive writing among the eighth grade students, the students can accept the material easily and enjoyable. Because of all the limitations described, researcher will focus on the problem of improving the students' descriptive writing ability by using Picture Word Inductive Model (PWIM).

D. Problem Formulation

Based on the background of the study above, the researcher formulates the problem as follows:

Can the Picture Word Inductive Model (PWIM) improve the students' descriptivewriting ability among the eighth grade students of SMP Karya Bhakti Rantau Jaya?.

E. Objectives and Benefits of the Study

1. Objective of the Research

According to the problem formulation above, the goal or the objectives of the study are as follows :

To know whether the Picture Word Inductive Model (PWIM) can effectively improve students' descriptivewriting ability in SMP Karya Bhakti Rantau Jaya.

2. Benefits of the Research

The result of the study are expected to provide useful information for english teachers in teaching descriptive writing using Picture Word Inductive Model (PWIM) at SMP Karya Bhakti Rantau Jaya, for the writers and for the next researcher as a reference who are interested in conducting similar studies in the next time. This study is also expected can contribute to all people who involved in developing quality of English education.

CHAPTER II

REVIEW OF THE RELATED THEORIES

A. The Concept of Writing Ability

1. The Definition of Writing Ability

According to Earl Pravette “ability” is the capacity to act, the quality of state of being able. It is the power to perform, whether physical, moral intellectual, or legal. Ability cannot be developed all at once. It is like building a house one brick must be laid at a time. The same principle applies to ability we must build a little each day. The ability enlightens and enlarges itself through its own applications. Therefore, the first way to develop ability is application. Then the second way is to lay down a challenge.¹

Writing is one of the important skills that should be mastered by a learner, because it is applied in many aspects of lessons. Talking about writing ability there are so many explanations of experts. According to Lucy, writing is a productive skill and, as such, the way we treat it in class has some similarities with the teaching and learning of speaking.²

In other definitions, writing is primarily a mental activity, but it relies on physical tools and resources from pens and paper to words

¹ Earl Pravette. *How to Turn Your Ability into Cash*. (USA : American Book Startford Press.1949). Second Edition.P.15

² Lucy pollard, *Lucy Pollard's Guide to Teaching English*, (All Rights Reserved: 2008), p. 49

processors.³Mike Fleming and David Stevens, defined that writing is an important controlling mechanism, a means of achieving orderly discipline in many lessons.⁴ While Donn Byre proposed that writing can be said to be the act of forming these symbols : making mark on a flat surface of some kind. But writing is clearly much more than the production graphic symbols, just as speech is more than the production of sounds.⁵Moreover, M.F. Patel, writing is a kind of linguistic behaviour. It presents the sounds of language through visual symbols. Writing is essential features of learning a language because it provides a very good means of foxing the vocabulary, spelling and sentence pattern.⁶

Robert P. Yagelski explains, writing ability is innate or exclusively the result of individual effort. This myth leads many students, to believe that they don't have the ability to write or writing is something that they have figure out exclusively on their own. Neither belief is true, in fact many social factor shape an act of writing. Individual skill and experiance along with effort and motivation do matter, but many other influence outside a writer's individual control affect of writing. In this sense, writing ability is as much a function of how writer respond to spesific rethorical situation, which are inherently social, as it is a result of individual skill.⁷

³ Mike Sharples, *How We Write: Writing As Creative Design*, (London: Routledge, 1999), p.6.

⁴ Mike Fleming and David Stevens, *English Teaching in the Secondary School*, (New York: Routledge, 2010), p.89.

⁵Donn Byre, *Teaching Writing Skills* ,(New York: Longman Group, 1988), p.1.

⁶ M.F. Patel Praveen, *English Language Teaching*, (Jaipur : Sunrise Publisher, 2008), p.125.

⁷Robert P. Yagelski. *The Essential of Writing Ten Core Concepts*. (USA: CengageLearning.2015).p.48

Based on the explanation above the researcher concludes that writing ability is the capacity to act the quality or the result of individual effort to express their ideas, thoughts, and feelings to other people in the written form to make the readers understand the ideas conveyed in the texts.

2. Types of Writing

Types of writing performance : four categories of written performance that capture the range of written production are considered here. Each category resembles the categories defined for the other three skills, but these categories, as always, reflect the uniqueness of the skill area.

- 1) *Imitative*. To produce written language, the learner must attain skills in the fundamental, basic of writing letters, word, punctuation, and very brief sentences. This category includes the ability to spell correctly and to perceive phoneme-grapheme correspondence in the English spelling system. It is a level at which learners are trying to master the mechanics of writing. At this stage, form is the primary if not exclusive focus, while context and meaning are of secondary concern.
- 2) *Intensive (controlled)*. Beyond the fundamental of imitative writing are skill in producing appropriate vocabulary within a context, collocation and idioms, and correct grammatical features up to the length of a sentence. Meaning and context are of some importance in determining correctness and appropriateness, but most assessment tasks

are more concerned with a focus on form, and are rather strictly controlled by the test design.

- 3) *Responsive*. Here, assessment tasks require learners to perform at a limited discourse level, connecting sentences into a paragraph and creating a logically connected sequence of two or three paragraphs. Tasks respond to pedagogical directives, lists of criteria, outlines, and other guidelines. The writer has mastered the fundamentals of sentence-level grammar and is more focused on the discourse conventions that will achieve the objectives of the written text. Form-focused attention is mostly at the discourse level, with a strong emphasis on context and meaning.
- 4) *Extensive*. Extensive writing implies successful management of all the processes and strategies of writing for all purposes, up to the length of an essay, a term paper, a major research project report, or even a thesis. Writers focus on achieving a purpose, organizing and developing ideas logically, using details to support or illustrate ideas, demonstrating syntactic and lexical variety, and in many cases, engaging in the process of multiple drafts to achieve a final product. Focus on grammatical form is limited to occasional editing or proofreading of a draft.⁸

⁸ Douglas Brown, *Language Assessment Principles and Classroom Practice*, (San Francisco: Longman, 2003), p.220.

3. Writing Process

The five-step process writing approach described by Donald Graves is presented here.

Step 1: Prewriting. The goal here is to generate ideas. Listing, brainstorming, outlining, silent thinking, conversation with a neighbor, or power writing (described below) are all ways to generate ideas.

Step 2: Drafting. Drafting is the writer's first attempt to capture ideas on paper. Quantity here is valued over quality. If done correctly, the draft is a rambling, disconnected accumulation of ideas. Most of the writing activities in the classroom involve just these first two steps. Only those drafts that students feel are interesting or of value should be taken to the next step (Donald Graves calls these hot topics).

Step 3: Revising. This is the heart of the writing process. Here a piece is revised and reshaped many times. The draft stage is like throwing a large blob of clay on the potter's wheel. Revising is where you shape the blob, adding parts, taking parts away, adding parts, and continually molding and changing. Here you look for flow and structure. You reread paragraphs and move things around.

Step 4: Editing. This is the stage where grammar, spelling, and punctuation errors are corrected. A word of caution: The quickest way to ruin a good writing project or damage a writer is to insist that step 4 be included in step 1, 2, or 3. If writers are editing or worrying about mechanics at the prewriting, drafting, and revising stages, the flow of ideas

and the quality of writing suffers. Precious brain space that is devoted to generating and connecting ideas will instead be utilized worrying about writing mechanics.

Step 5: Publishing and sharing. This is where students' writing is shared with an audience. Writing becomes real and alive at this point. Publishing can involve putting together class books, collections of writing, school or class newspapers, school or class magazines, or displaying short samples of writing in the hall or out in the community.⁹

4. The Measurement of Writing Descriptive Text Ability

The indicators of evaluation of students' writing ability as follows¹⁰:

Table 2
The Test proficiency of Writing ability Scores

No	Writing Ability Specification	Score	Standard
1	Content	0-24	thesis statement, related ideas, development of ideas through personal experience, illustration, fact, and opinion, use of description, cause/effect, comparison/contrast and consistent focus.
2	Organization	0-20	effectiveness of introduction, logical sequence of ideas, conclusion and appropriate

⁹ Andrew P. Johnson, *Teaching Reading and Writing*, (USA: Rowman & Littlefield Education, 2008), p.179-180.

¹⁰H Douglas Brown. *Teaching by Principle*. (California : Addison wesley, 2000), p. 357-358

			length
3	Discourse	0-20	topic sentence, paragraph unity, transition, discourse markers, cohesion, rhetorical conventions, reference, fluency, economy and variation.
4	Syntax	0-12	effective complex construction, few errors of agreement, tense number, word order/function, article, pronoun, and preposition
5	Vocabulary	0-12	effective word or idiom choice and usage, word form mastery, appropriate register
6	Mechanics	0-12	spelling, punctuation, citation of references, neatness and appearance.
total score		100	

B. The Concept of Descriptive

Description is writing that creates a clear and vivid impression of the topic. Description translates your experience of a person, place, or thing into words, often by appealing to the physical senses : sight, hearing, smell, taste, and touch.¹¹

¹¹ Susan Anker, *Real Writing With Readings*, (Boston: Bedford/st, 2004), p.155.

According Gayle and Lawrence that effective description creates image in the reader's mind by using specific details.¹²

Meanwhile, Dorothy and Lisa explain that descriptive text explains how someone or something looks or feels.¹³

Moreover, according Susan Anker in his book, there are four basics of good description :

- 1) It creates main impression (An overall effect, feeling, or image the topic).
- 2) It uses specific examples to supports the main impression.
- 3) Supporting those examples with detail that appeal to the five senses : sight, hearing, smell, taste, and touch.
- 4) Bringing a person, place, or physical object to life for the reader.¹⁴

In other definition, descriptive text is a text which describes a particular person, place or thing. In the descriptive text consists of the following structure.

1. Identification, identifies the thing to be described.
2. Description, describes parts, qualities, characteristics of something to be described.¹⁵

¹² Gayle Feng, and Lawrence Checkeet, *The Write Start Sentence To Paragraph*, (Boston: Wadsworth, 2010), p.159.

¹³ Dorothy E Zemach, and Lisa A Rumisek, *Academic Writing From Paragraph to Essay*, (Oxford: Macmillan, 2003), p.25.

¹⁴ Susan Anker, *Real Writing With Readings.*, p.155.

¹⁵ Nur Zaida, *Bright*, (PT.Gelora Aksara Pratama: Erlangga, 2013), p.151.

Based on the explanation above, the researcher concludes that descriptive is text which describes person, place and thing. The purpose of this text is transferring the experience what they see, read, or feel.

C. The Concept of Picture Word Inductive Model (PWIM)

1. Definition of Picture Word Inductive Model (PWIM)

According Calhoun in his book, The PWIM is an inquiry-oriented language arts strategy that uses pictures containing familiar objects and actions to elicit words from children's listening and speaking vocabularies. Teachers used the PWIM with classes, small groups, and individuals to lead them into inquiring about words, adding words to their sight-reading and writing vocabularies, discovering phonetic and structural principles, and using observation and analysis in their study of reading and writing.¹⁶

PWIM can help student notice phonetic principles of word and expand their sight word knowledge. Many young children have a rather wide range of words in their speaking and listening vocabularies, and this strategy seeks to get those words into their writing and reading vocabularies.¹⁷

According to Adams, Johnson, & Connors, in Calhoun's book say that "the concept of using pictures as a stimulus for language experience

¹⁶ Emily.F.Calhoun, *Teaching Beginning Reading And Writing With Picture Word Inductive Model*, (Alexandria, VA: association for supervision and curriculum development, 1999), p.21.

¹⁷ Jennifer L. Altiely, *Powerful Content Connectio*, (New York: International Reading Association, 2014), p.70.

activities in the classroom was developed specifically for teaching young students to read and write well.¹⁸

Whereas, according to Rowena Douglas, Picture Word inductive Model (PWIM) is a language arts strategy teacher uses with two or three units a year. Teacher put up a picture or poster that relates the topic the class is discussing.¹⁹

Moreover, Picture Word Inductive Model (PWIM) is designed to teach reading, writing, and the language system. It is designed to help students develop as independent learners and independent readers and to foster confidence based on knowledge that they secure for themselves as learners.²⁰

2. The Principles of Picture Word Inductive Model (PWIM)

The principle of PWIM is to build on children's growing storehouse of words and syntactic forms and to accelerate the transition to written forms. Besides, an essential principle of the PWIM is that the model respect the children's language development : their words are used and their ability to make associations is cultivated.²¹ Thus, a major principle of the model is that students have the capability make generalizations that can help them to master the conventions of language.²²

¹⁸*Ibid.*, p.24-25.

¹⁹ Rowena Douglas, et.al, *Linking Science & Literacy*, (USA:National Science Teacher Association, 2006), p.185.

²⁰ Emily.F.Calhoun, *Teaching Beginning Reading And Writing With Picture Word Inductive Model.*, p.30.

²¹*Ibid.*, p.26

²²*Ibid.*, p.22.

3. The Advantages of Picture Word Inductive Model

The Picture Word Inductive Model (PWIM) is a satisfying and pleasurable activity. They enjoy finding objects and action in the picture, seeing the words and sentences they generate expressed in print and become part of the curriculum, classifying words and sentences, and discovering useful language concepts and generalization. The PWIM motivates students because most become successful learners. Learners succeed when using the model because the PWIM is based on inquiry into how children learn and how to enhance their learning, including their development of language, the process of learning to read and write, and the reading and writing connection.²³

PWIM is that it approaches the development of sight vocabulary directly.²⁴ Therefore, it can add vocabulary students to make descriptive text.

4. Strengths of the Picture Word Inductive Model (PWIM)

The basic moves of the PWIM stress these components of phonics, grammar, mechanics and usage:

- Students hear the words pronounced correctly many times and the picture word chart is an immediate reference as they add these words to their sight vocabulary. The teacher can choose to emphasize almost any sound and symbol relationship (introduce or taken mastery).

²³*Ibid.*, p.24.

²⁴*Ibid.*, p.27.

- Students hear and see letters identified and written correctly many times.
- Students hear the words spelled correctly many times and participate in spelling them correctly.
- In writing the sentences, the teacher uses standard English (transforming students' sentences if necessary) and uses correct punctuation and mechanics (e.g., commas, capital letter). As different mechanical and grammatical devices are used, the teacher describes why the device is used. After many lessons and experiences with the teacher modeling the devices, the students learn how to use them too.²⁵

5. The Application of Picture Word Inductive Model to Improve Writing Descriptive

Application of Picture Word Inductive Model in writing descriptive text, there can be a cycle or a series for the teaching process.

The teacher should do some activity that as follows are:

- a) Select a picture.
- b) Ask the student to identify what they see in the picture.
- c) Label the picture parts identified. (Draw a line from the identified object area, say the word, write the word; ask students to spell the word aloud and then to pronounce it).
- d) Read and review the picture word chart aloud.

²⁵ *Ibid.*, p.27

- e) Ask students to read the words (using the lines on the chart if necessary) and to classify the words into a variety of groups. Identify common concepts (e.g., beginning consonants, rhyming words) to emphasize with the whole class.
- f) Read and review the picture word chart (say the word, spell it, say it again).
- g) Add words, if desired, to the picture word chart and to the word banks.
- h) Lead students into creating a title for the picture word chart. Ask students to think about the information on the chart and what they want to say about it.
- i) Ask students to generate a sentence, sentences, or a paragraph about picture word chart. Ask students to classify sentences; model putting the sentences into a good paragraph.
- j) Read and review the sentences and paragraphs.²⁶

PWIM (Picture Word Inductive Model) to develop students' vocabulary, as well as sentence and paragraph structures. Our classroom used a PWIM poster, but not in the usual way. Rather than "shaking out" words, categorizing words, writing sentences, organizing them, and writing paragraphs, we used them to practice the skill of fact and opinion. Our science bulletin board had a PWIM poster on it of elephants in their environment. Students could easily "shake out" elephant structures (ears, tusks, trunks, etc.), but they didn't know the functions of these structures.

²⁶ Emily.F.Calhoun, *Teaching Beginning Reading And Writing With Picture Word Inductive Model.*, p.23.

Students used nonfiction text to research the structures and discover the functions that help them survive in their environment. Rather than write words on the poster, fact statements were written about an elephant's structures and functions during their research process.²⁷

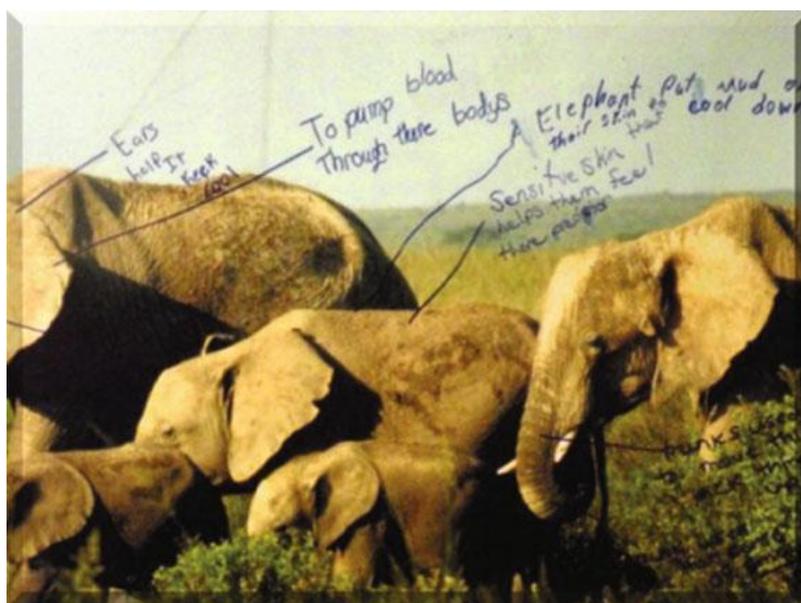

Figure 10-7. PWIM poster used for finding unique elephant structures and functions.

Based on the set of the procedure above, finally the researcher can conclude that these rules is very important to the teacher. It can help the teacher when teaching writing in the classroom by using Picture Word Inductive model (PWIM) to improve their descriptive writing.

D. Action Hypothesis

Based on the frame of the theories and assumption above, the researcher formulated the hypothesis was as followed “By Using Picture

²⁷ Briand hand, *Voices From The Classroom*, (Netherlands : Sense Publisher,2011),p.117.

Word Inductive Model (PWIM), the students would be able to improve their Descriptive Writing ability among the eight graders of SMP KARYA BHAKTI Rantau Jaya.

CHAPTER III

RESEARCH METHODOLOGY

A. Operational Definition of Variable

Operational definition of variable is explained about variables that used in this research. The indicators included in a variable are result of the synthesis theory which is used on the theoretical review.

The object in this research included 2 variables, they are independent variable and dependent variable.

1. Dependent Variable

Dependent variable of this research is the variable which is observed and measure to determine the effect of the independent variable. Dependent variable of this research is descriptive writing ability.

2. Independent Variable.

Independent is the variable which selected, manipulated, and measured by the researcher. Independent variable of this research is the usePicture Word Inductive Model (PWIM) which can be defined as thestrategy a simple strategy to develop the children's confidence in descriptive writing ability.PWIMitself is teaching strategy that can be used to teach writing. Actually to increase students writing, it because PWIMcan make the students more enjoy the learning process, also the

students more easy understand the materials. Moreover, indicator of this variable is the students can write well in the class for descriptive writing ability.

B. Setting of the Research

This research would be conducting SMP Karya Bhakti. It was located in Rantau Jaya, East Lampung. Total of the students from the seventh up to ninth graders were 102 students. This research was about the use of Picture Word Inductive Model (PWIM) into improve students' descriptive writing ability at SMP Karya Bhakti Rantau Jaya. The researcher choose the eighth grader with the total students were 28 students because their descriptive writing ability had low. It was based on the result of pre survey score of students at the eighth graders of SMP Karya Bhakti Rantau Jaya.

C. Subject of the Research

Subject of the research is the eighth grader of SMP Karya Bhakti Rantau Jaya. This class consists of 28 students. They are 14 boys and 14 girls. The researcher chose this class because from the fact and the result of pre-observation, it was shown that the students' interest and achievement of writing still low. The researcher find some students has difficulties to understand how to write descriptive, because they do not know to determine the appropriate word about the topic. The strategy that use by teacher is not interested, so the researcher tried using Picture Word

Inductive Model (PWIM) to improve students descriptive writing ability. After using Picture Word Inductive Model (PWIM) in learning process, it would be hoped that would be able to increase learning result and studies activity.

D. Procedure of The Research

1. The Concept of Classroom Action Research

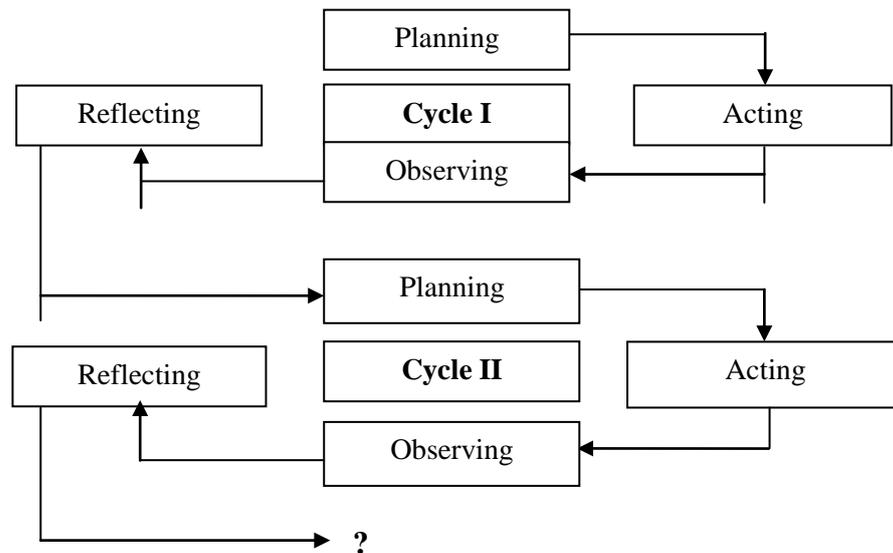

This research is classroom action research. Action research is conducted by one or more individuals or groups for the purpose of solving a problem or obtaining information in order to inform local practice. Those involved in action research generally want to solve some kind of day-to-day immediate problem, such as how to decrease absenteeism or incidents of vandalism among the student body, motivate apathetic students, figure out ways to use technology to improve the teaching of mathematics, or increase funding.²⁸ It means action research is a strategy to find out the problems in the learning process in order to change either technique or strategy that is suitable.

From the explanation above, it could be inferred that classroom action research is a research in teaching and learning in the class which the aim is to solve problem or to repair something. It means collaboration between teachers and researchers to know the problems that exist with the aim to improve the learning process.

²⁸ Jack R. Fraenkel and Norman E. Wallen, *How to Design and Evaluate Research in Education*. (McGraw-Hill: New York. 2009) p.589.

Figure 1

Here is step of classroom action research design:

This research would be conducted in two cycles. Each cycle consist of planning, acting, observing, and reflecting. The improvement of research could be seen from a series of cycles, each incorporating lesson from previous cycles.

2. The Advantages of Classroom Action Research

We can think of at least five advantages of doing action research.

- a. First, it can be done by almost any professional, in any type of school, at any grade level, to investigate just about any kind of problem. It can be carried out by an individual teacher in his or her classroom. It can be done by a group of teachers and/or parents, by

a school principal or counselor, or by a school administrator at the district level.

- b. Second, action research can improve educational practice. It helps teachers, counselors, and administrators become more competent professionals. Not only can it help them to become more competent and effective in what they do, but it can also help them be better able to understand and apply the research findings of others. By doing action research themselves, teachers and other education professionals not only can improve their skills, they can also improve their ability to read, interpret, and critique more formal research when appropriate.
- c. Third, when teachers or other professionals design and carry out their own action research, they can develop more effective ways to practice their craft. This can lead them to read formal research reports about similar practices with greater understanding as to how the results of such studies might apply to their own situations. More importantly, such research can serve as a rich source of ideas about how to modify and perhaps enrich one's own strategies and techniques.
- d. Fourth, action research can help teachers identify problems and issues systematically. Learning how to do action research requires that individuals define a problem precisely (often operationally), identify and try out alternative ways to deal with the problem,

evaluate these ways, and then share what they have learned with their peers. In effect, action research “shows practitioners that it is possible to break out of the rut of institutionalized, taken-for-granted routines and to develop hope that seemingly intractable problems in the workplace can be solved.”

- e. Fifth, action research can build up a small community of research-oriented individuals within the school itself. Action research, when systematically undertaken, can involve several individuals working together to solve a problem or issue of mutual concern. This can help reduce the feeling of isolation that many teachers, counselors, and administrators experience as they go about their daily tasks within the school. One of the current authors, before becoming a university professor, taught high school social studies. During his first year of teaching, he was assigned a class of particularly difficult students. Some of the other teachers in the school had been working systematically as part of an action research project to test and evaluate various strategies for dealing with such students. They shared what they had learned (through their own action research). Their support and sharing of information proved invaluable to a somewhat overwhelmed beginner.

3. Action Plan

Classroom Action research (CAR) Cycles are:

a. Cycle I

1) Planning

Planning is the first step in every activity, Researcher explained about what, why, when, where, who and how the action was done. Without planning, the researcher's activity would not focus. The planning would be reference in doing action. Here are the steps that the researcher did in planning:

- a) The researcher identified the problem causes and finds the problem solving.
- b) The researcher made a lesson plan.
- c) The researcher prepared the material, approach and technique of teaching.
- d) The researcher prepared the source of learning
- e) The researcher prepared format to observe
- f) The researcher prepared the instrument of evaluation.

2) Acting

Doing action is the second step in activity. It was the realization from the planning the researcher has made. Without the action the planning just imagination that never could be real. After finishing the planning, the learning process had done in the eighth grade of SMP Karya Bhakti Rantau jaya. It

described about teaching procedures of the research. There are the steps that the researcher did in the action:

- a) The teacher applied the lesson plan
 - b) The teacher explained the advantages of using Picture Word Inductive Model (PWIM) strategy in teaching Writing Descriptive text.
 - c) The teacher explained the strategy of learning to write descriptive text well.
 - d) The teacher asked the students to discuss with their group about the lesson or materials.
 - e) The teacher guided the students in teaching learning process based on the lesson plan.
- 3) Observing

Observing is the activity of recording the event and action. Based on the observation, the researcher could determine whether there was anything that the researcher has to be improved soon in order that the action can achieve the aim of researcher want. The observation was done in teaching learning process. In this step, the researcher observed the process of teaching learning by using form of observation.

4) Reflecting

This step is reflection and evaluation to acting was done. The reflecting is the fourth steps that researcher was done. The

researcher tried to see and amuse again something that researcher has done. It was also know whether there was effect to the students' learning process. By reflection, the researcher analyzed and discussed result during teaching learning like the weakness and strength done by the researcher and the students during teaching learning process. The researcher decided that the next cycle focused on the weakness in preview cycle.

b. Cycle II

1) Planning

- a) The researcher identified the problem and found the problem from the first cycle
- b) The researcher prepared a lesson plan
- c) The researcher prepared the material, method and strategy of teaching
- d) The researcher prepared the source of learning
- e) The researcher prepared format to observe
- f) The researcher prepared the instrument of evaluation.

2) Acting

This stage designed on the basis of result of planning of cycle II.

3) Observing

In this step, the researcher observed the process of teaching learning by using format of observation to collect the data in action plan II.

4) Reflecting

In this step, the researcher compared the score of pre-test and post test. The researcher reviewed and reflected on students' activity and teacher performance whether it was positive or negative, the second cycle enough or need for the next step.

E. Data Collecting Technique

In collecting the data, the writer used the following technique:

1. Observation

Observation is a monitoring and recording systematically to the phenomenon that is investigated. It means that observation is a data collection strategy in which the activities of subjects are visually examined

The purpose of the observation is to explain the situation being investigated: activities, people, or individuals are involved in an activity and the relationship among them.

2. Test

In this research the writer used test as data collection method to measure both of variables. The test was using students' writing. The

test was about descriptive text. In this research there are two kinds of test, they are pre-test and post-test. The material in pre-test and post-test are different but have same difficulties. The type of the test is written test.

a) Pre test

Pre test was administered before treatment was given to know how far the students writing descriptive text, especially for the material would be taught by the writer in this research. The researcher gave the students pretest by asking the students to answer the questions about descriptive text with used place as an object for describing to assess the students' writing.

b) Post-test

The post-test was given in the last meeting after doing treatments to find out whether the treatments gave any contribution to the students' achievement in the class or not. This step was done after the treatment to know the improving of students' writing descriptive text by using Picture Word Inductive Model (PWIM). The test was similar to pre-test where the students were asked to describe object, but the topic which was given in the post-test and it was different with in the pre-test.

3. Field Notes

The writer used field notes to record activities during the teaching and learning of writing through Picture Word Inductive Model (PWIM) in the classroom. Including description of classroom atmosphere, students' attitude, and teacher's creativity in presenting the materials of writing.

4. Documentation

The researcher used documents which were taken from the data of the school such as total of the students, the teachers and the condition of the school.

F. Data Analysis method

1. The Analysis of Learning Result Data

After setting the data from the result of pre test and post test the researcher would analyze the data based on the limitation of the problem and objective of the research. To know whether there was any improving or not for the students writing descriptive text with using Picture Word Inductive Model (PWIM) strategy. After the students was given treatment. Then, the results were matched with the minimum mastery criteria (KKM) in the school. At the eighth graders of SMP Karya Bhakti Rantau Jaya, the minimum mastery criterion (KKM) for English subject is 68.

There some students were not successful in cycle 1, the researcher continued to conduct the cycle 2. In cycle 2 the students were

successful, so the cycles stopped because the students had achieved the minimum mastery criteria. its mean that, in cycle 2 all of the students were successful. It was not continue to other cycle. To found the average score, the data was analyzed by using:²⁹

$$X = \frac{\sum X}{\sum N}$$

Explanation:

X = Mean or average score

$\sum N$ = the total number of cases

$\sum X$ = the number of students

G. The Indicator Of Success

The indicator of the successful took from the process and the result of the action research. The students ware called success if 60% students got 68 and 60% active in learning process.

²⁹ Donald, Ary, et.al, *Introduction to Research in Education*, (All Right Reserved: 2010), p.108.

CHAPTER IV

RESULT OF THE RESEARCH AND INTERPRETATION

In this chapter, the researcher would be present the result of the research. It includes the dokumentation of SMP Karya Bhakti Rantau Jaya Udik II, the result of the research and the interpretation of the research.

C. Description of Research Location

6. The History of SMP Karya Bhakti Rantau Jaya Udik II

SMP Karya Bhakti Rantau Jaya Udik II established in 2014 , For the first time SMP Karya Bhakti Rantau Jaya Udik II receive 2 classes with the total students are 60 students. The located of SMP Karya Bhakti Rantau Jaya Udik II is in desa Rantau Jaya Udik II , Sukadana, East Lampung.

The Head of SMP Karya Bhakti Rantau Jaya Udik II is Riza Andrian Zen, S.Pd.

Since SMP Karya Bhakti Rantau Jaya Udik II was established , he has been lead by the following principal;

Table 3

The principal of SMP Karya Bhakti Rantau Jaya Udik II

No	Name Of Headmaster	Period
1	Riza Andrian Zen, S.Pd.	2014-2017
2	Wahid Hasyim, S.Pd.I	2017-now

7. The Profil of SMP Karya Bhakti Rantau Jaya Udik II

Name of school	: SMP Karya Bhakti Rantau Jaya Udik II
NPSN / NSS	: 69921521/-
Province	: Lampung
Regency	: Kab. East Lampung
Sub district	: Sukadana
Village	: Rantau Jaya Udik II
Street	: Desa Rantau Jaya Udik II
RT / RW	: 003 /001
Post Code	: 34194
Phone number	: 082371046829
E-mail	: smpkaryabhakti1@gmail.com

8. The Condition of Teacher and Official Employer in SMP Karya Bhakti Rantau Jaya Udik II

The total of teacher and official employer of SMP Karya Bhakti

Rantau Jaya Udik II was 17 that could be identified in the table bellow:

Table 4

1. The Condition of Teacher and Official Employer in SMP Karya Bhakti Rantau Jaya Udik II in academic year 2017/2018

No	Teacher name	Level	Position
1	Wahid Hasyim, S.Pd.I	S1	HEADMASTER
2	Jumanto, S.Pd.	S1	Teacher
3	Marleny, S.Pd.I	S1	Teacher
4	Dewi Halimah, S.Pd.I	S1	Teacher

D. Description of the Research

This research used the action research approach, that had purpose to improve the activity and the study result of SMP Karya Bhakti Rantau Jaya Udik II is conducted in 2 cycles. The improving of the activity and the study result in this research is by using Picture Word Inductive Model (PWIM). The study result was gotten through test that was given to the students in the begin research and in the end every cycle, while the activity data was gotten from the observation when the learning activity was happened. The research conducted pre-test to know the students ability in writing descriptive text before giving treatment and it used as the comparison score with post-test. The students were given task to write a descriptive text. After they finished the pre-test , the researcher asked them to study about the material more . The result of the pre-test could be seen on the table below:

Table 7
Students' English writing score at the class VIII

No	Name	Pre-Test	Note
1	ADA	37	failed
2	AT	69	passed
3	DF	69	passed

25	VJS	42	failed
26	WS	43	failed
27	WS	41	failed
28	YS	67	failed
total score		1296	
Average		46,29	
highest score		69	
lowest score		29	

Based on the pre-test table, it can be inferred that all of the students got < 68. Here students mark of writing ability in descriptive text, as follow:

Table 8

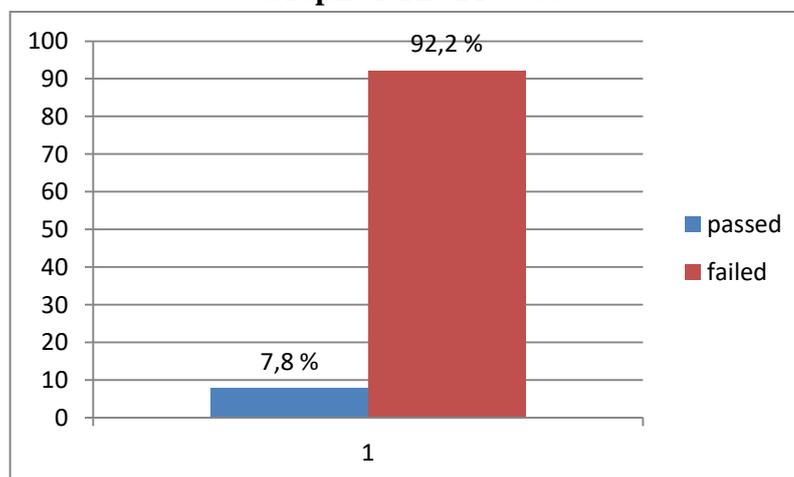

Students Mark of writing ability in descriptive text pre-test

No	Mark	Frekuensi	Percentage	Category
1	≥ 68	2	7,8%	Passed
2	≤ 68	26	92,2%	Failed
Total		28	100%	

Based on the table above, it could be analyzed that there were 2 students (7,8%) who get a minimum score and 26 students (92,2%) who failed the pre-test. The lowest score in pre-test (29) and

the highest score was (69). It mean that the students did not fulfill the minimum score at SMP Karya Bhakti Rantau Jaya Udik II and the students writing ability in descriptive text was low. Bisedes, from the result of pre-test the research got avarege score 46. Therefore , it was the reason why the researcher used Picture Word Inductive Model (PWIM) as a strategy to improve the students' writing ability.

Figure 4
Graph of The Pre test

a. Cycle 1

Cycle 1 consist of planning, acting , observing and reflecting.

The following step of pre-test that did by the researcher ;

1. Planning

The first meeting was done on (october, 11 2017), it was open by praying, greeting , checking attendance list, and introducing the reseacher as a teacher for the students. At the day, the researcher has taken the students pre-test score.

Based on the pra-survey score, the researcher has identified and found there are some problem after taking the students pre-test score.

Therefore, the researcher and collaborator prepared several things related to the teaching and learning process such as the English subject lesson plan, material, media, writing test and observation sheet that contains about list of the students' names and activity during the English learning process.

2. Acting

The second meeting was treatment and the third meeting was post test 1. The researcher conducted the treatment and post test 1 on (October, 18 2017). In this meeting the researcher as an English teacher and Mrs Evi Vitriana, S.Pd as a collaborator. The researcher started the meeting by praying, greeting, checking attendance list and asking the condition of the students'. Afterwards, the researcher gave the material of descriptive text.

At the beginning of the teaching learning process, the researcher asked the students' about descriptive text. Some of the students' knew about descriptive text. Secondly, the researcher explained about descriptive text. After that, the researcher gave the students' an example of descriptive text.

After that, the researcher explained about the rule of Picture Word Inductive Model (PWIM) strategy. The researcher showed a picture that represented a content topic. The researcher asked the students to tell what they saw in the picture. The researcher drew a line from the identified object area and led students into creating a title for the

picture word chart. After finishing, The researcher asked students to generate a sentence, sentences or paragraphs about picture word chart related to the topic. The researcher students' guided the students' more active in learning process. The researcher gave some tema such as; tiger, rose , apple, forest, etc. After that the students just gave one tema. In the and meeting of meeting, the researcher gave feedback to the students' of learning process. The researcher gave motivation and informed to the students' about the activities in the next meeting.

After did the treatment, the researcher gave post test 1 to the students'. Then the researcher continued to give treatment again to the students', it was conducted (october, 19 2017), the post test was done to know how the students' writing ability after giving treatment.

In the post test 1, (october, 18 2017) students' who got good mark, but the result of the students' was better than the students' test before giving treatment. In this season, the researcher got the result of students' post test 1 in cycle 1. The result can be seen, as follow;

Table 9
Post test 1 score of writing ability in descriptive text.

no	Name	post test 1	Note
1	ADA	45	Failed
2	AT	69	Passed
3	DF	70	Passed
4	DS	43	Failed
5	DI	46	Failed
6	EA	69	Passed

7	EH	43	Failed
8	HP	68	Passed
9	IF	34	Failed
10	IS	60	Failed
11	JR	48	Failed
12	JIW	47	Failed
13	K	57	Failed
14	LN	49	Failed
15	MS	36	Failed
16	NYS	69	Passed
17	NA	45	Failed
18	NH	41	Failed
19	RS	44	Failed
20	RR	69	Passed
21	RF	59	Failed
22	R	55	Failed
23	SS	68	Passed
24	SA	68	Passed
25	VJS	53	Failed
26	WS	51	Failed
27	WS	47	Failed
28	YS	69	Passed
total score		1522	
average		54,34	
highest score		70	
lowest score		34	

Based on the table above, there were (9) students' ≥ 68 and (19) students' got < 68 , the following were the table of students' score mark of post test 1 :

Table 10

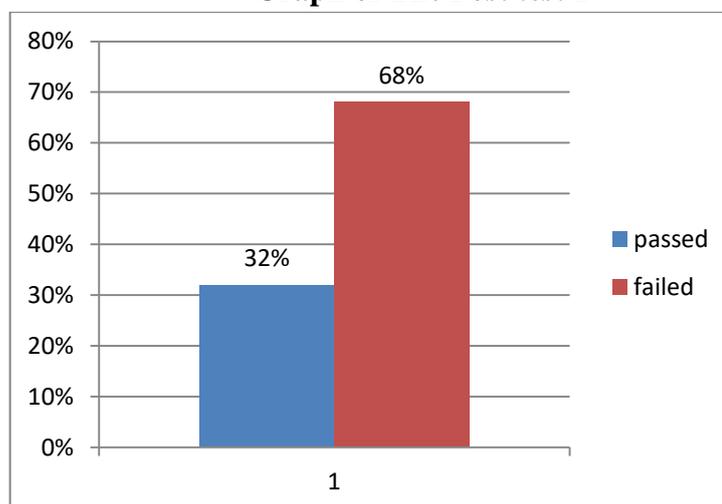

Students' Mark of post-test 1 of writing ability in descriptive text

No	mark	frequency	percentage	Category
1	≥ 68	9	32%	Passed
2	< 68	19	68%	Failed
total students'		28	100%	

From the table above, it could be analyzed that the students' average score was (54,34). the highest score (70), and the lowest score was (34). based on the minimum mastery criterion (KKM), there was (9) on post test 1 got score ≥ 68 . It mean that in cycle 1 the students' achievement could improve enough, but it was not successfull yet.

Figure 5

Graph of The Post test 1

3. Observing

In the observing of the researcher action, the collabolorator observed the students' activities. The reseacher as the teacher gave material about write a descriptive text and trained the by using Picture Word Inductive Model (PWIM) as a strategy in learning process.

In learning process, there were five measurment used and mentioned to know the students' activy. Every students who has

active in learning process gave thick in observation sheet. Then, the students who didnot active in learning process, let the observation sheet empty.

It could be seen on appendix, the indicators of the students activities were :

- a. The students pay attention of the teacher explanation
- b. Giving respond
- c. Participating in learning process
- d. Following teacher instruction
- e. Making notes

The result of the students' learning activities could be seen, as follow ;

Table 11
The students activities in cycle 1

No	Students Activities	Frequency	Precentage
1	pay attention to teacher explanation	16	57,7
2	Giving respond	5	17,9
3	Participating in learning process	6	21,4
4	Following teacher instruction	14	50
5	Making notes	26	92,8
total students		28	

The table showed that not all the students active in learning process. There were 16 students' (57,7%) who gave attention to the teacher explanation 5 students'(17,9%) who gived respond, 6 students' (21,4%) Participating in learning process , 14 students' (50%) followed teacher instruction, and 26 students' (92%) could make descriptive text.

4. Reflecting

Based on the result, it can be said that Picture Word Inductive Model (PWIM) has positive effect to the students' in teaching learning process, and it can be seen from cycle 1 although the students' who got the score more than 68 only, but there was an improvement.

Although there were improvement of the result from cycle 1, but the teaching learning process by using Picture Word Inductive Model (PWIM) strategy had achieved criteria mastery learning process of the research yet. This failure can be seen who got score more than 68 were less 50%. It can be concluded that cycle 1 was not successful yet because the indicator succes was not reached yet and the researcher had to revise the teaching and learning process in the next cycle. Therefore, this research would be continued in the next cycle.

b. Cycle 2

The cycle 2 was semilary with cycle 1. It devided into planning, acting, observing and reflecting. It would be explained more, as follows;

1) Planning

Based on observation and reflection in cycle 1, it showed that cycle 1 was successful yet. Therefore, the researcher and collabolator tried to revise the learning process in cycle 2. The research prepared lesson plan, material, media, answer sheet, observation sheet and the test for post test II.

2) Acting

The description of teaching and learning process in cycle 2 was not different from the previous cycle. In each treatment, the research tried to make students' more active. The implementation of this step was conducted in two meetings, namely: treatment and post test.

The treatment in cycle 2 was conducted on october 25 2017. It was started by greeting and asking the students' condition. The researcher as a teacher explained the material about descriptive text. The teacher asked to the students' to mention about example of descriptive text, the generic structure of descriptive text and the leanguage feature of descriptive text. The teacher explained more about descriptive text to the students and the teacher tried to make an example of descriptive text with the students. The teacher tried again applied Picture Word Inductive Model (PWIM) strategy for the students', then teacher asked them to make descriptive text based on the theme that they have chosen. In the and of meeting, teacher closed the meeting and give motivation to the students' to study hard.

After giving treatment in cycle 1 and 2 , the researcher conducted post test on october 25 2017. It was same type in cycle 1. After students' finish the test, the researcher analyzed the result of the students' in post test 2. The result of post test 2 could be seen on table bellows;

Table 12
The result of post test 2 of students' writing ability in descriptive text.

no	Name	post test 2	Note
1	ADA	61	Failed
2	AT	77	Passed
3	DF	75	Passed
4	DS	57	Failed
5	DI	61	Failed
6	EA	74	Passed
7	EH	69	Passed
8	HP	69	Passed
9	IF	59	Failed
10	IS	72	Passed
11	JR	69	Passed
12	JIW	60	Failed
13	K	75	Passed
14	LN	60	Failed
15	MS	72	Passed
16	NYS	71	Passed
17	NA	68	Passed
18	NH	70	Passed
19	RS	57	Failed
20	RR	71	Passed
21	RF	74	Passed
22	R	68	Passed
23	SS	73	Passed
24	SA	70	Passed
25	VJS	69	Passed
26	WS	64	Failed
27	WS	73	Passed
28	YS	75	Passed
total score		1913	
Average		68,32	
highest score		77	
lowest score		57	

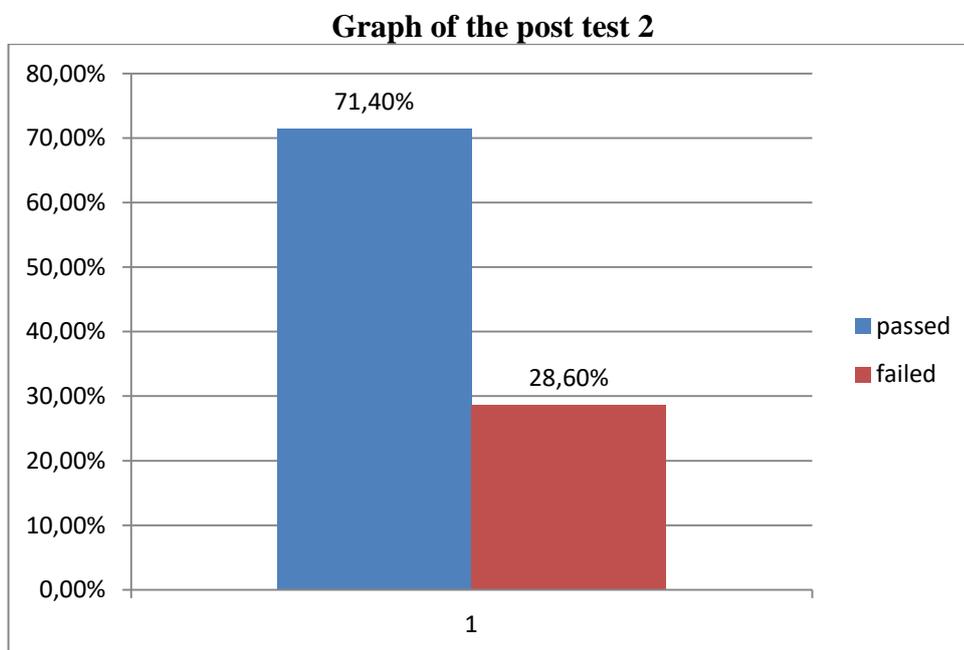

Based on the table bellow, there was 20 students' got ≥ 68 and 8 students' got < 68 . The following were the table of the students' score mark of post tes II

Table 13
Students' mark of post test II

No	Mark	Frekuensi	Percentage	Category
1	≥ 68	20	71,4%	passed
2	< 68	8	28,6%	failed
Total		28	100%	

Based on the table above, it could be seen that the students' average score in post test II was 68,32 the highest score was 77 and the lowest score was 57 most of the students' could improve their writing ability in descriptive text. It mean that cycle 2 was succesfull.

Figure 6

3) Observing

The observation on the students' activity is conducted when the learning process was continuing. It was conducted by the collabolorator

by using the observation sheet. The data of the observation sheet can be seen from the result of the observation students' activities which has been improving poin from cycle 1 to cycle 2.

The data of the students' activity can be seen in the table bellow;

Table 14
The result of the students' activity in the learning process in cycle 2

No	Students Activities	Frequency	Percentage
1	pay attention to teacher explanation	26	92,85
2	Giving respond	10	35,71
3	Participating in learning process	13	46,42
4	Following teacher instruction	18	64,28
5	Making notes	28	100
total students		28	

The data above explained that who paid attention to the teacher explanation were 26 (92,85%). Students were Giving respond, they were 10 (35,71%). The students' activity in learning process and followed teacher instuction had 13 (46,42%%) and 18 (64,28%) students'. The most improving reached out of all the students' 28 (100%) could make descriptive text .

4) Reflcting

According the result of the observation above, it can be inferred that the result of using Picture Word Inductive Model (PWIM) strategy was good. The researcher checked the students' score before and after using Picture Word Inductive Model (PWIM) as the strategy for teaching learning process. The researcher found the significant improvement in students' score in writing ability aspicially in descriptive text. The comparison between the students' score at pre-

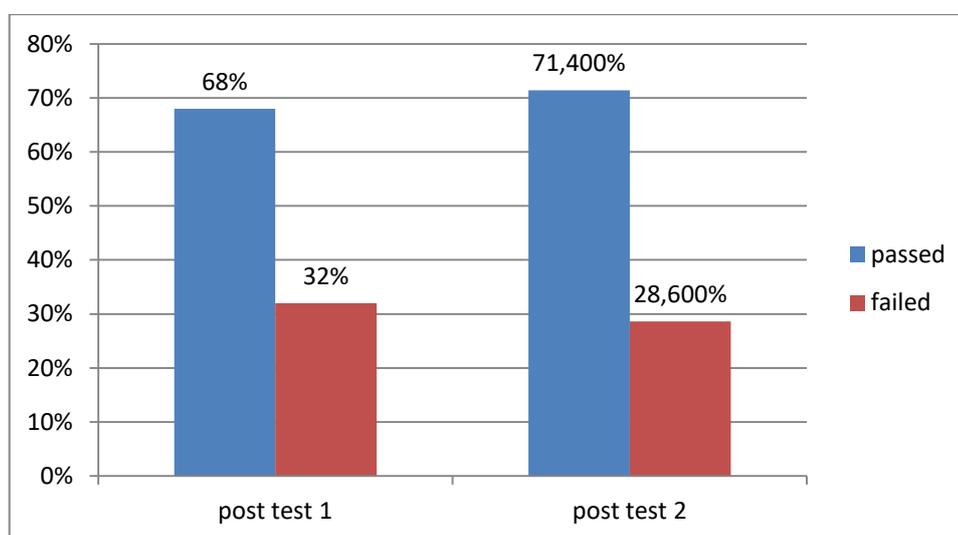

test, post-test 1 and post test 2 has taken. All students' got improvement score in cycle 2.

Table 15
The comparison between the students' score at post-test 1 and post-test 2.

no	Name	post test 1	post test 2	Increasing	increasing presentage	Explanatiom
1	ADA	45	61	16	57,14	Improved
2	AT	69	77	8	28,57	Improved
3	DF	70	75	5	17,85	Improved
4	DS	43	57	14	50	Improved
5	DI	46	61	15	53,57	Improved
6	EA	69	74	5	17,85	Improved
7	EH	43	69	26	92,86	Improved
8	HP	68	69	1	3,57	Improved
9	IF	34	59	25	89,28	Improved
10	IS	60	72	12	42,85	Improved
11	JR	48	69	21	75	Improved
12	JIW	47	60	13	46,42	Improved
13	K	57	75	18	64,28	Improved
14	LN	49	60	11	39,28	Improved
15	MS	36	72	36	128,57	Improved
16	NYS	69	71	2	7,14	Improved
17	NA	45	68	23	82,14	Improved
18	NH	41	70	29	103,57	Improved
19	RS	44	57	13	46,42	Improved
20	RR	69	71	2	7,14	Improved
21	RF	59	74	15	53,57	Improved
22	R	55	68	13	46,42	Improved
23	SS	68	73	5	17,85	Improved
24	SA	68	70	2	7,14	Improved
25	VJS	53	69	16	57,14	Improved
26	WS	51	64	13	46,42	Improved
27	WS	47	73	26	92,85	Improved
28	YS	69	75	6	21,42	Improved
total score		1522	1913	391	1396,31	
average		54,34	68,32	13,96	49,87	

Based on the table of the comparison of students' score in post-test 1 and post-test 2 above, shows that the result of the students' writing ability in descriptive text in post test 2 was successful and the cycle able to stoped until cycle 2.

Figure 7
Graph of post-test 1 and post test 2

3. Interpretation

A. Cycle 1

In this research, a researcher gave the students pre-test individually for the purpose to investigate the students' writing ability in descriptive text before giving a treatment. In the pre-test, there were 2 students' (7,8%) who get a minimum score and 26 students' (92,2%) who failed the pre-test. Futhermore, the lowest score in pre-test was 29 and the highest score was 69.

After did the pre-test, the researcher gave the treatment to the students' in cycle 1. The treatment was coonducted by teaching the

students' by using Picture Word Inductive Model as the strategy. Furthermore, the researcher gave the post-test in the next meeting and the post-test was named post-test 1.

Afterward, by analyzing the result of the post-test 1, the researcher conducted there were 9 students' (32%) students' passed the post-test 1, the lowest score was 34 and the highest score was 70 and the average score was 54,34 .

From the result of students' score in pre-test and post-test 1, there was an improvement from the result score. It could be seen from the average score in pre-test 46,29 and post-test 1 was 54,34. Although there was an improvement of the students' achievement, cycle 1 was not successful yet because only 9 students' (32%) who passed in post-test 1. It means that cycle 1, the students' achievement could improve enough but it was not successful because the indicator of successful was not reached yet.

B. Cycle 2

After analyzing the students' score in the post-test of cycle 1, the research had to conduct the next cycle because only 9 students' (32%) passed the test and got the score ≥ 68 .

In the next cycle, the researcher gave the treatment then post-test 2. Furthermore, the researcher analyzed the result of post-test 2 and inferred that there were 20 students' (71,4%) passed the test because they got >68 . In this post test, the lowest score was 57, the highest score was 77, and the average score was 68,32.

From the result of the students' score from post-test 2, it could be conducted that there were improve score. The average score could be seen on the average score. The average score in the post-test 1 and post-test 2 54,34 were and 68,32. In the pre-test, post-test 1 and post-test 2, the total students' who got the score ≥ 68 were 2, 9, and 20 students'. Because the achievement of the students' had improved enough and the indicator of successful was reached, the researcher was successful and could stop in cycle 2.

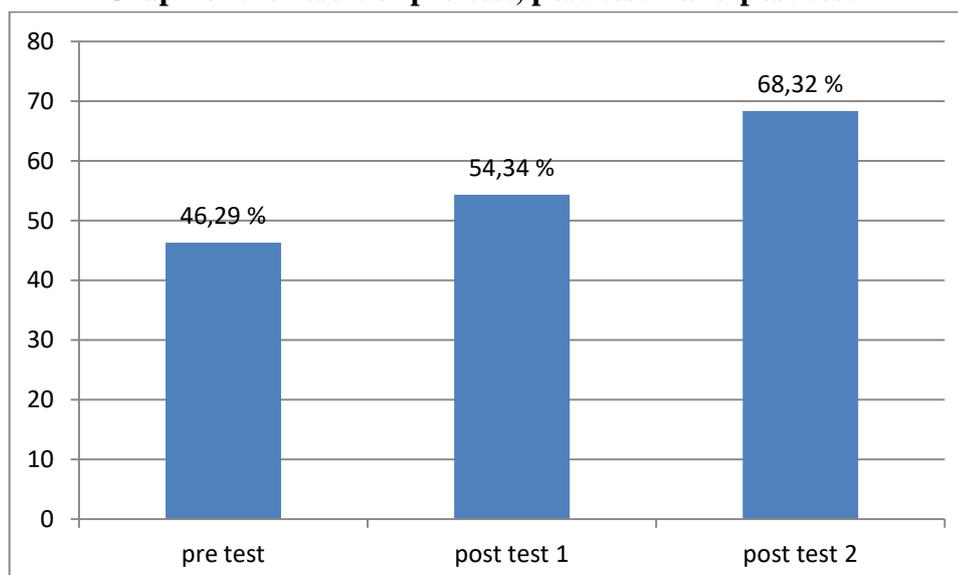

Table 16
Students score in pre-test, post-test 1 and post-test 2

No	name	pre-test	post-test 1	post-test 2	criteria
1	ADA	37	45	61	Improved
2	AT	69	69	77	Improved
3	DF	69	70	75	Improved
4	DS	38	43	57	Improved
5	DI	37	46	61	Improved
6	EA	63	69	74	Improved
7	EH	39	43	69	Improved
8	HP	39	68	69	Improved
9	IF	32	34	59	Improved
10	IS	37	60	72	Improved
11	JR	38	48	69	Improved
12	JIW	29	47	60	Improved
13	K	52	57	75	Improved
14	LN	41	49	60	Improved
15	MS	32	36	72	Improved
16	NYS	44	69	71	Improved
17	NA	50	45	68	Improved
18	NH	64	41	70	Improved
19	RS	37	44	57	Improved
20	RR	57	69	71	Improved
21	RF	46	59	74	Improved

22	R	52	55	68	Improved
23	SS	57	68	73	Improved
24	SA	39	68	70	Improved
25	VJS	42	53	69	Improved
26	WS	43	51	64	Improved
27	WS	41	47	73	Improved
28	YS	67	69	74	Improved
total score		1296	1522	1913	
average		46,29	54,34	68,32	

Based on the result of pre-test, post-test 1 and post-test 2, it was known that there was a positive significant improvement of the students' score. It could be seen from the average 46,29 pre-test. In post-test 1 the average was 54,34 and the average in post-test 2 became 68,32. Therefore, the researcher concluded that the research was successful because the indicator of successful in this research has been achieved. The graph of the result of pre-test, post-test 1 and post-test 2.

Figure 8
Graph of the result of pre-test, post-test 1 and post-test 2

Based on the graph above , it can be conclude that using Picture Word Inductive Model (PWIM) as a strategy can improve the students' writing ability in descriptive text. It can be seen from the improvement score of pre-test, post-test 1 and post-test 2.

The students' learning activities in cycle 1 and cycle 2.

The students' learning activities data was gotten from the whole sudents' learning activities on observation sheet. The table as bellow:

Table 17
The table of students' activities in cycle 1 and cycle 2

No	Name	cycle 1		cycle 2		increasing
		f	precentage	f	precentage	
1	pay attention to teacher explanation	16	57,7	26	92,85	35,15
2	Giving respond	5	17,9	10	35,71	17,81
3	Participating in learning process	6	21,4	13	46,42	25,02
4	Following teacher instruction	14	50	18	64,28	14,28
5	Making notes	26	92,8	28	100	7,2

Based on the result above, it could be concluded that there was an improvement of students' learning activities during the study time cycle be cycle by using Picture Word Inductive Model (PWIM) strategy. It could be seen from the average result oof students' observation sheet in cycle 1 and cycle 2. In cycle 1 the average 47,13 and became 80,76 in cycle 2. It means that Picture Word Inductive Model (PWIM) strategy had positive effect toward the teaching learning process.

CHAPTER V

CONCLUSION AND SUGGESTION

Considering all data gathered from this classroom action research, the researcher has drawn up some conclusion of the research and some suggestion that support the research result.

A. CONCLUSION

Based on the result of the result and interpretation, the research would like to conclude the research as follow:

Using Picture Word Inductive Model (PWIM) as a strategy especially English subject was very effective to improve the students' writing ability in descriptive text at the eighth grade of SMP Karya Bhakti Rantau Jaya Udik II east lampung. Even though in cycle 1 the students' writing ability in descriptive text still poor in their score, but on the cycle 2 most of the students' could achieve the target of CMI.

It can be seen from the average score from pre-test was 46,29, post-test 1 was 54,34 and became 68,32 in post-test 2. In other word the students' result improved 13,98 from cycle 1 to cycle 2. From the students' result observation sheet, it can be seen that the result of observation sheet in cycle 1 67 became 95 in cycle 2. In other word the students' result of observation sheet improved 28 from cycle 1 to cycle 2. It means that by using Picture Word Inductive Model (PWIM) students' can improve their writing ability in descriptive text.

B. SUGGESTION

Referring to the data and the documentation in the previous chapter, the researcher finally comes the following suggestion:

- a. For the students'
 1. Writing is practice, don't be shy to express idea when the teaching learning was done.
 2. By using Picture Word Inductive Model (PWIM) strategy, the students' are hoped more active in group to express their writing.

- b. For the teacher

Teacher as motivator should always encourage their students' to produce better writing by giving much exercise to write a descriptive text. Teacher should always remember that only by practicing make students' writing well.

RENCANA PELAKSANAAN PEMBELAJARAN (RPP)

Satuan Pendidikan : SMP KARYA BHAKTI
Kelas/Semester : VIII / 1
Mata Pelajaran : Bahasa Inggris
Topik : Descriptive text
Alokasi Waktu : 2 x 40 menit (2 x pertemuan)

A. Kompetensi Dasar

Merespon makna yang terdapat dalam monolog pendek sederhana secara akurat, lancar, dan berterima untuk berinteraksi dengan lingkungan sekitar dalam teks berbentuk *descriptive* dan *recount*.

B. Indikator Pencapaian Kompetensi

1. Mengidentifikasi informasi/makna yang terdapat dalam text berbentuk *descriptive* dan *recount*.
2. Mengidentifikasi tujuan komunikatif dan langkah retorika teks *descriptive* dan *recount*.

C. Tujuan Pembelajaran

1. Siswa mampu mengidentifikasi informasi/makna yang terdapat dalam text berbentuk *descriptive* dan *recount*.
2. Siswa mampu mengidentifikasi tujuan komunikatif dan langkah retorika teks *descriptive* dan *recount*.

D. Materi Ajar

Teks tulis yang menggunakan ungkapan untuk menyatakan keberadaan orang, benda dan binatang.

Struktur teks

- Menyebutkan nama orang, binatang, benda dan nama bagian-bagiannya yang dipilih untuk dideskripsikan

- Penggunaan nominal singular dan plural secara tepat, dengan atau tanpa *a, the, this, those, my, their*, dsb secara tepat dalam frasa nominal
- Ucapan, tekanan kata,
- Intonasi, Ejaan dan tanda baca
- Tulisan tangan

E. Metode Pembelajaran

1. Pendekatan : Diskusi

F. Media, Alat and Sumber Pembelajaran

- **Alat** : Boardmarker, Whiteboard
- **Sources** :
 - **LKS Bahasa Inggris Galileo**
 - **Internet**

H. Kegiatan Pembelajaran :

1. Kegiatan Pendahuluan

➤ **Apersepsi and Motivation :**

- Guru memberi salam dengan senyuman.
- Guru menanyai kabar siswa.
- Guru mengecek kehadiran siswa.
- Guru memberikan motivasi sebelum memulai pelajaran.
- Guru menghubungkan pelajaran dengan pengalaman siswa dengan kehidupan siswa sehari-hari.

2. Kegiatan Inti

➤ **Exploration**

- Guru meminta siswa untuk mengamati, Siswa melihat gambar di buku wajib siswa, mendengar dan menyimak guru menjelaskan tentang keberadaan orang, benda, dan binatang.
- Guru bertanya kepada siswa tentang pertanyaan yang berkaitan dengan materi tentang keberadaan orang, benda, binatang, dan dengan bimbingan guru, peserta didik bertanya tentang kata-kata baru yang mereka temukan.
- Guru meminta siswa untuk mengumpulkan Informasi mendengarkan dan menyimak banyak contoh dari macam-macam ungkapan terkait keberadaan orang, benda, binatang,

➤ **Elaboration**

- Guru meminta siswa untuk menirukan contoh-contoh dalam bahasa Inggris dengan ucapan, tekanan kata, intonasi, dan sikap yang benar.
- Guru menjelaskan dan membimbing siswa dalam mengidentifikasi ciri-ciri (fungsisosial, strukturteks, dan unsure kebahasaan) terkait keberadaan orang, benda, binatang, keberadaan orang, benda, binatang, dengan tepat dan benar.

- Guru meminta siswa berusaha menggunakan bahasa Inggris untuk menyatakan keberadaan orang, benda, binatang, keberadaan orang, benda, binatang, yang terjadi secara rutin.
- Guru meminta siswa membandingkan membuat ungkapan keberadaan orang, benda, binatang, menggunakan bahasa Inggris dengan Bahasa Indonesia.

➤ **Confirmation**

- Guru memberikan feedback kepada siswa dengan memberikan point nilai bagi yang telah mempresentasikan deskriptifnya.
- Guru menyempurnakan teks descriptive yang telah dibuat siswa.
- Guru menanyai siapa siswa yang belum paham tentang materi deskriptif.

3. Kegiatan Penutup

- Siswa diminta untuk membuat kesimpulan tentang materi yang disampaikan guru.
- Guru meminta siswa mendeskripsikan gambar yg terdapat di lembar kerja post-test
- Guru meminta siswa mengumpulkan lembar kerja post-test
- Guru memberi kesimpulan tentang materi pembelajaran.
- Guru memberi motivasi siswa agar giat belajar.
- Guru menutup pelajaran dengan mengucapkan salam dan see you.

Penilaian Hasil Pembelajaran

Kriteria Penilaian

1. Tingkat ketercapaian fungsi social tentang menyatakan kemampuan melakukan suatu tindakan serta responnya.
2. Tingkat ketepatan unsur kebahasaan: keaslian penulisan, pilihan kosa kata, penulisan kosa kata, dan kerapihan tulisan.

2. Siswa mampu mengidentifikasi tujuan komunikatif dan langkah retorika teks *descriptive* dan *recount*.

D. Materi Ajar

Descriptive Text is a text which describes a particular person, place or subject.

A descriptive text consists of:

- Identification which identifies the person, place or object described.
- Description which describes parts, qualities and characteristics of the person, place or object.

My Shaun the Sheep Bolster

identification

I got a surprise this morning. My uncle visited our house and he brought me a bolster with the head of Shaun the sheep on it. The head is completed with its long ears and wide stupid eyes. I bet you know about this funny character.

description

This new bolster is made of soft fabric. When I touch it, it feels like touching woolly fabric, soft and fluffy. The length of the bolster is about a meter. The lower parts's colour is black, while the upper part is white. The bolster has two front legs, but strangely it doesn't have back legs.

E. Metode Pembelajaran

1. Pendekatan : Diskusi
2. Strategi : Picture Word Inductive Model (PWIM)

F. Media, Alat and Sumber Pembelajaran
